

emineo: Company Profile

We never stop thinking for you

emineo is a consulting firm that specializes in IT-aided business solutions. As our client, you are our top priority. We provide you with help and advice ranging from the analysis of your commercial problems to the live deployment of the new system on site in your premises. In close collaboration with you, emineo consultants compile an in-depth view of their task: you don't always get what you initially expected, but invariably what you actually need!

The personal touch is our specialty

We specialize in customized IT solutions that are tailored precisely to your needs and the initial situation in your company.

We integrate our solutions into your existing, company-wide system infrastructure on the basis of a service-oriented architecture. SOA enables us to construct flexible systems that can be rapidly adapted to changing business processes and requirements.

Owing to the manageable size of our company, we are flexible enough to respond to your, our customer's, needs. Even where our business processes and project management are concerned, we adapt ourselves to your specific needs. So it is not just the end product we develop that is individual, but also the way we deal with you!

Consulting services

IT strategy

emineo helps you develop and set up your IT strategy using established, modular strategy development models.

Not only do our advisory services show you how your IT architecture can optimally support your corporate strategy, they also place instruments at your disposal that can be implemented practically. This is because only a clearly defined strategy will enable you to reach your goals.

Integration and user productivity

We show you which methods and technologies you can use in your specific situation to set up an integrated, highly-productive environment. In concert with you, we evaluate the deployment of and migration onto a service-oriented architecture –

emineo AG, Zürich

Founded 2001

8 employees

Core competencies:

- Consulting services
- Software development
- Technology

Technical specialties:

- Java /J2EE - open source
- SAP NetWeaver
- SAP Portal
- Web Dynpro for Java
- Master Data Management
- Composite Application Framework
- Adobe Interactive Forms
- Exchange Infrastructure

a flexible basis for user-friendly applications and cross-company processes. It's ultimately the practicable solution that interests us, not the technology!

Project management

We offer you selective help when it comes to project management or, if required, take over the entire management. Our competent project reviews afford you a fresh "third-party opinion". We seek out weak spots in your processes and point out possible optimizations and "best practices".

Software development

emineo supports you at all stages of software development; ranging from business process modeling and needs analyses, design and implementation right through to the roll-out and support.

Technologies

Our core competence is the use of Java /J2EE technologies in combination with SOA methodology. We use a wide range of sturdy, proven applications and standards. The focus of our efforts is always on generating benefit.

We are just as proficient in traditional software development as we are in SAP NetWeaver®. We combine the most effective and best aspects of “open-source” and “SAP NetWeaver”, make system boundaries disappear and free you from technological paradigms.

SAP NetWeaver platform

We do not just advise you on the optimum use of the SAP NetWeaver platform, but also have proven project experience and competencies in the individual components. In this regard, we concentrate on those areas that support a service-oriented architecture in order to provide you with tangible added value in the long-term.

Open-source technologies

When developing software, we trust in tried-and-tested, open-source technologies. Based on the SOA methodology, we combine a variety of technical components to form robust and powerful applications. For you this means cost-optimized software, optimum investment protection and readily available expertise.

Renowned companies place their trust in emineo

emineo's competencies are in demand in a wide range of industries. Our customers include major companies such as Swiss Life, Swiss Re and Swisscom IT Services as well as state-run agencies (seco, Finance Ministry of the canton of Zurich, National Alarm Center). Whether lotteries (Swisslos), car spares (Technomag) or railways (Ahaus Alstätter Eisenbahn) – emineo guarantees needs-oriented, reliable solutions in all areas!

The company

emineo was founded in 2001 by Werner Zecchino (CEO) and Christoph Winkler (CTO).

The recipe for our success is a keen interest in all things new, efficient working methods and the exceptional skills of our employees. This enables us to help give you outstanding IT solutions to promote your business.

- **Do you want to discover the practical benefits of a service-oriented architecture for your company?**
- **Do you want to implement company-wide processes using your existing applications and B2B scenarios?**
- **Do you want to increase the efficiency of your SAP NetWeaver environment and integrate processes?**

emineo is the ideal partner for you to...

- combine all the benefits of open source with those of commercial plat-forms (SAP).
- accelerate your business innovations.
- reduce costs by re-using resources.
- continue using your existing applications with new functions.
- achieve a high degree of flexibility.
- combine all the benefits of open source with those of commercial plat-forms (SAP).

Drop us a line or give us a call! We would be glad to give you information about our solutions without any obligation on your part.
